

SPRING CLEANING

words by Elisabetta Romanò

AFTER FOUR LONG MONTHS OF "SECLUSION", IT'S TIME TO COME OUT OF HIBERNATION AND ENJOY A CHANGE OF SCENERY! CLEANING HOME FOR THE MONTHS AHEAD, DOING SOME OUTDOOR ACTIVITIES, GETTING BACK INTO SHAPE AND MAKING THE MOST OF THE WARMER WEATHER...

COMPACT. The brand new mirrorless Canon EOS M50 has every intention to surprise. Small but incredibly technological, it is still big on quality, starting with the possibility to make 4K videos. The LCD touch screen monitor makes it possible to film even the most complex angles, as well as taking selfies: it's perfect for snapping a spring picnic.

FLOATING. The first LG magnetic levitation speaker floats, gently suspended in the air. The levitation station is the base above which a wireless speaker reproduces surround sound. The Levitating portable speaker is also totally waterproof, making it ideal for a BBQ in the garden with friends.

ALMOST INVISIBLE. Delight in preparing a meal, demands a quiet and relaxing kitchen free from smells and loud noises. Sirio, the new Falmec cooker hood, combines the power of perimeter suction with aesthetic appeal and boasts built-in installation to the counter-ceiling, a shiny glass surface and a dimmable lighting system to create a great atmosphere.

SPORTY & CLASSY. Beoplay H5 earphones by B&O seem to have been designed specially to music lovers who demand elegance, even when doing sport. They aren't just original and beautiful, they're above all practical and ideal for a walk or run: wireless and with up to 5-hour battery life, they're easy to charge and can be integrated with the Beoplay app.

AROMATHERAPY. For every moment of the day, for every mood, for every need there's a corresponding scent. A complete sensory experience is what Bouquet by Digital Habits aims to provide; it's a minimal diffuser with a technological heart. In fact, the internal light and the different scent scenarios can be controlled by an app and adjusted as required.

FRESHNESS. The wardrobe of the future isn't just somewhere to keep your freshly-laundered clothes, it even cleans and refreshes those you've already worn. Thanks to photocatalytic oxidation technology, Air Cleaning System by Lema silently tackles eliminating odours, bacteria, moulds and pollutants from your clothes and footwear, so everything is always fresh and tidy – a real revolution!

WAKE UP. Waking up feeling refreshed is key to tackling a new day and spring is the ideal time to begin a new morning routine fully energised... to the sound of music. Tivoli Audio has created Model Three specially to meet this need; a Bluetooth clock radio that fuses retro and modern.

EVERYWHERE. Colourful, portable and waterproof, Sony's SRS XB10 is small, but full of surprises. Above all, despite its compact size, thanks to the Extra Bass system it reproduces base notes like a professional speaker, but there's more – it can be taken anywhere, guarantees up to 16 hours' battery life and can even get wet. The perfect partner for any cycle ride!
